SURFACE PREPARATION INNOVATION

Version Date: September 2013

Title: Blast Suits and Gloves

BLAST SUITS AND GLOVES

Blastrite's blast suits and leather blast gloves are designed to protect abrasive blasting operators from the dangers of re-bouncing abrasive, dust and debris created by blasting action. Our blast suits and leather blast gloves are particularly suited to applications using metallic abrasives, such as steel grit and chilled iron grit.

The suits are manufactured out of hard-wearing denim and feature tough and durable front vinyl insets. This design protects operators whilst also keeping them cool.

Six blast suit sizes are available.

Specifications

Stock code	Description	Weight
EQP-AB-40537	Blasting suit – small	2.00 kg (4.41 lbs)
