Title: Circle Blast 1

CIRCLE BLAST 1/4" INTERNAL PIPE BLASTING TOOL

The Circle Blast 1/4" Internal Pipe Blasting Tool is designed to blast the internal surfaces of pipes with internal diameters ranging from 19mm to 50mm.

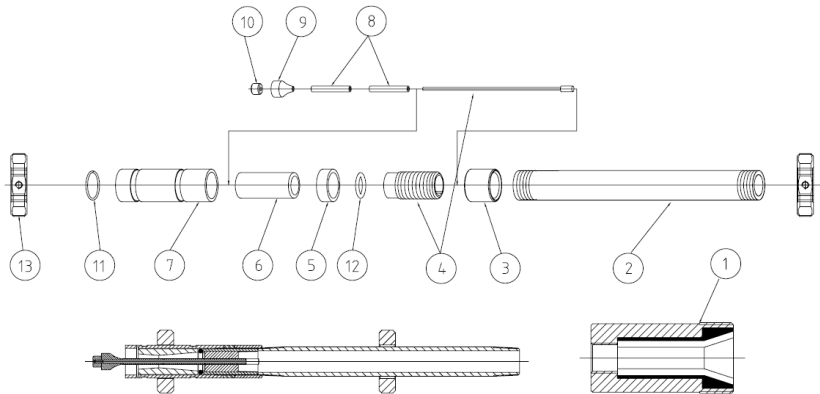

The unit features a built in short venturi nozzle system combined with a Tungsten Carbide deflection tip. This deflection tip deflects the abrasive into a 360° blast pattern as it exits the end of the Circle Blast assembly.

The unit is supplied complete with a set of centring collars to centre the tool within the pipe. Wear parts are constructed from tungsten carbide for maximum durability.

For maximum performance the unit requires 80 cfm / 135 m³/h at 7 bar.

Note: PART NO BAC-BA-PB-0040
