**Version Date:** January 2011

**Title:** High Pressure Airless Paint Hose

**HIGH PRESSURE AIRLESS PAINT HOSE**

Blastrite's high pressure airless hoses have an inner core of polyamide, resistant to most of the solvents used in the paint industry, and a cover made of polyurethane for excellent flex fatigue and abrasion resistance.

Manufactured to meet special requirements and specifications, these airless hoses are especially recommended for use with all type of air-assisted and airless units. The hoses can be produced with or without electrical conductivity.

**Features & Benefits**

- Safety thermoplastic hose to work at higher operating pressures
- Excellent resistance to paints, solvents and chemicals
- Exceptional flexibility, flex fatigue & non kinking properties
- Comes standard with an abrasion & ozone resistant cover
- Superior electrical conductivity, except for SN
- Small bend radius & very light weight
- High volumetric expansion capability
- Temperature range: -40°C to 95°C -40°F to 210°F
