Commercial Information

SURFACE PREPARATION INNOVATION

Version I Date: OCTOBER 2013

Title: OPERATOR BREATHING EQUIPMENT

OPERATOR BREATHING EQUIPMENT

Blastrite's breathing air filters can be used in conjunction with other compressor safeguards to supply clean air to airline respirators and many pneumatic tools and systems.

Our filters are designed to remove 98% of the particles down to 0.5 micron size, but will not remove carbon monoxide and other toxic gases from the airline. Monitors or suitable filters are available.

Product Features and Benefits:

- Versatile mounting system – position, turn and lock in either floor or wall mounting position.
- Easy mounting for Carbon Monoxide Monitor.
- Optional auto drain valve removes moisture continuously from filter housing to increase filter cartridge lifespan.
- Large capacity 6 stage filter cartridge removes moisture, particulates to 0.5 micron and odour to provide clean, breathable air.
- 125psi safety pressure release valve.
- Quick disconnect coupler.
- Outlet regulator allows adjustable air pressure between 0-125psi.
- Filter cartridges have replacement date sticker for maintenance scheduling.
- Strong, robust, lightweight housing.
- Brass drain tap fitted as standard.
- 1" Npt inlet port.

Filter cartridges should be replaced every 400 working hours or 3 months.

SURFACE PREPARATION INNOVATION

Portable/Stationary Abrasive Blast Equipment - Nozzles - Nozzle Holders - Hoses - Couplings - Lighting
Wetblast Equipment - High Pressure Waterjetting - Personal Protection - Blast Cabinets - Blastrooms
Vacuum Blast/Recovery Equipment - Portable/Stationary Wheelblast Equipment - Dehumidifiers
Pipe Cleaning/Coating - Air Treatment - Mobile Dust Collectors - Media - Paintspray Equipment
Plural Component - Measuring Instruments
